STATISTICAL REPORT

OF THE

SUPERINTENDENT OF PUBLIC INSTRUCTION

For the Year Ending July 1, 1929

FOREWORD

There is presented herewith the Annual Statistical Report of the Superintendent of Public Instruction for the school year ended July 1, 1929. This material makes available complete statistical information about the public schools of Pennsylvania, and in addition sundry educational data that are more or less general in nature. In order to keep the volume to a practicable size, summary tables are frequently used in the presentation of data. Detailed information relative to individual school districts or institutions is available in the Department of Public Instruction.

While no attempt has been made to analyze or interpret the information contained in the tables, an effort has been made to organize the data in such a way that significant facts may be easily deduced therefrom. It is hoped that school officials, research workers, and others interested in the problems of public education may find it possible to secure from the tabular material presented sufficient information to make an analysis of the progress of education in this Commonwealth.

The material in the Report has been prepared by Mr. Jonas E. Wagner, Director of Statistics, Research and Reports.

JOHN A. H. KEITH,
Superintendent of Public Instruction.

TABLE 4. CLASSIFICATION OF SCHOOL DISTRICTS

The legal basis for the classification of school districts is embodied in the following provisions of the School Laws of Pennsylvania.

Section 101. Each city, incorporated town, borough or township in this Commonwealth now existing or hereafter created, shall constitute a separate school district ..... The several school districts thus established and formed shall be, and hereby are, divided into four classes as follows:

Section 102. Each school district having a population of five hundred thousand (500,000), or more, shall be a school district of the first class.

Section 103. Each school district having a population of thirty thousand (30,000), or more, but of less than five hundred thousand (500,000), shall be a school district of the second class.

Section 104. Each school district having a population of five thousand (5,000), or more, but of less than thirty thousand (30,000), shall be a school district of the third class.

Section 105. Each school district having a population of less than five thousand (5,000), shall be a school district of the fourth class.

Section 106. The last United States census as set forth in the official report thereof shall be the basis on which the population of the several school districts shall be computed. No change shall be made from one class of school district to another, except after the taking of a United States census showing the population of any school district to be such as to entitle it to be changed from one class of school district to another; or except when the population of the two districts combined subsequent to the taking of the census and ascertained by such census is such as to entitle the new or combined district to be in a class different from the class of either of the districts so combined; .....

In accordance with the provisions of the law thus cited, the number and classificiation of school districts in 1928-1929 by counties, is indicated herewith.

Function of an Age Grade Table

An age grade table similar to the accompanying copy serves a purpose very much similar to that of a thermometer or a barometer. Although the table does not provide the corrections that should be made at points out existing conditions and provides the data necessary to study trends in the progress of children in a school. It shows where modifications should be made. It indicates to each superintendent, to each principal and to each teacher the desirability of answering completely the questions proposed in the Pennsylvania School Attendance Register.
